

# moveArm() function

In the arduino code if you want to create animation or move any arms you must use moveArm() function the parameters are:

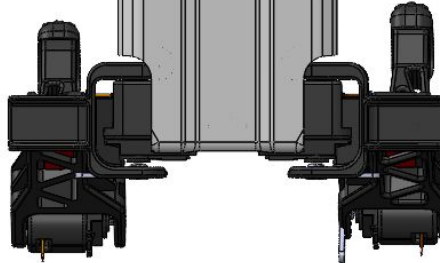

```
moveArm(Front leg left - X, Z, Y,/ Rear leg left - X, Z, Y/ Front leg right - X, Z, Y/ Rear leg right - X,  
Z, Y, Speed ( between 1 to 100, 1 fast 100 very slow))
```

Front left leg  
(1st parameter)

Front right leg  
(3rd parameter)

Rear left leg  
(2nd parameter)

Rear right leg  
(4th parameter)

# moveArm() function

## X Y Z positions
